Discussion: PA -

Brown Manufacturing Company (BMC) site is located in Oklahoma City, OK, and is an operating business which has fabricated and finished light metal since 1942. They have been alloying, anodizing and picketing metal with an eleven tank bath system. The waste water is treated until it meets City Industrial Wastewater Discharge Permit levels, and then it is discharged into the city sewer. The site does not appear to have any hazardous waste on the site and is clearly maintained. No further action is recommended at this site.
